EDUCATION

SRM University AP

B.Tech in Computer Science and Engineering

CGPA: 9.56/10

Aug 2024 – May 2028

SKILLS

Programming Languages: C, C++, Python, SQL

Frameworks / Technologies: React, Node.js, Express, Streamlit, Qt

Tools: Git, GitHub, VS Code, CMake

Databases: MongoDB, SQL

Core: Data Structures, Algorithms, OOP, System Design Basics

PROJECTS

SmartTrace — AI Debugging Code Analysis System

GitHub

- Built a scalable developer tool to analyze large codebases for bugs and inefficiencies.
- Designed modular architecture supporting multi-language parsing and extensible analysis.
- Implemented AI-driven debugging suggestions with automated fixes.
- Developed backend pipelines for efficient large-scale repository processing.

AI Policy Assistant (hackRx 6.0)

GitHub

- Developed an AI assistant to process policy documents and answer queries accurately.
- Implemented document chunking, embeddings, and semantic retrieval using vector database.
- Integrated LLMs to generate structured outputs (status, payout, justification).
- Improved explainability by linking responses to supporting clauses.

ChefKart – Home Chef Booking Platform (Node.js, Express.js, MongoDB, Razorpay)

GitHub

- Developed a full-stack home chef booking platform enabling users to discover chefs, schedule bookings, manage payments, and track booking status.
- Designed and implemented RESTful APIs using Node.js and Express.js with MongoDB for user, chef, booking, review, payment, and notification management.
- Integrated secure authentication, role-based access control (User/Chef/Admin), and chef verification workflows.
- Built real-time notification features for booking requests, confirmations, rejections, and payment updates.
- Implemented online payment processing and booking management with status tracking, reviews, ratings, and chef availability scheduling.

PROBLEM SOLVING

- Strong foundation in Data Structures and Algorithms.
- Solved 200+ problems across arrays, trees, recursion, DP, and graphs.
- Comfortable writing optimized and clean code under constraints.

ADDITIONAL INFORMATION

- Convenor, Fitness Club – SRM University AP
- Member, Singularity Advanced Research Lab
- Interested in backend systems and AI-driven applications
